Writers & marketers
Drafts & edits emails, content, and campaigns

Analysts & researchers
Reads files, spots trends, and cites sources

Ops & business teams
Automates multi-step tasks across tools

March 2023
Claude 1 — the first release
Anthropic's first assistant model, made available to a small set of early users and partners.

July 2023
Claude 2 — opens to everyone
First public release, with a much longer 100K-token context window for reading long documents.

March 2024
Claude 3 family arrives
Splits into three tiers — Opus, Sonnet, Haiku — and gains vision to read images and charts.

June 2024
Sonnet 3.5 & Artifacts
Claude starts building interactive documents, code, and visuals in a live side panel.

October 2024
Computer use
Claude learns to operate a computer directly — moving a cursor, clicking, and typing.

May 2025
Claude 4 & Claude Code
A major reasoning leap with Opus 4 and Sonnet 4, plus general release of Claude Code.

Late 2025 – Early 2026
Rapid iteration: 4.5 → 4.8
Faster, cheaper, and increasingly agentic with each step, including Claude Design.

June – July 2026
Claude 5 family
Fable 5, Sonnet 5 & Opus 5 — 1M-token context and near-autonomous work. Claude today.
